6. Canceled
7. Canceled
8. Canceled
9. (Original) An article comprising:
a formable metal substrate;
one or more pigmented ionomer layers at least partially disposed on the formable metal substrate; and
one or more transparent ionomer layers at least partially disposed on the one or more pigmented ionomer layers.
10. (Original) The article of claim 9, wherein the one or more pigmented ionomer layers comprise a copolymer of one or more C₂ to C₄ α -olefins and one or more C₃ to C₆ α,β -ethylenically unsaturated carboxylic acids.

11. (Original) The article of claim 9, wherein the one or more transparent ionomer layers comprises a copolymer of one or more C₂ to C₄ α -olefins and one or more C₃ to C₆ α,β -ethylenically unsaturated carboxylic acids.
12. (Original) The article of claim 9, wherein the formable metal substrate is un-polished.
13. (Original) The article of claim 9, further comprising one or more tie-layers disposed between the one or more pigmented ionomer layers and the formable metal substrate.
14. (Original) The article of claim 9, further comprising one or more barrier layers at least partially disposed on a second surface of the formable metal substrate.
15. (Original) The article of claim 14, further comprising one or more tie-layers disposed between the second surface of the formable metal substrate and the one or more barrier layers.
16. (Original) The article of claim 9, wherein the one or more pigmented ionomer layers are opaque.
17. (Original) The article of claim 14, wherein the one or more barrier layers comprises polypropylene, polyethylene, thermoplastic materials, or any combination thereof.
18. (Original) The article of claim 13, wherein the one or more tie-layers comprises one or more acid polymers, one or more epoxy polymers, one or more maleated polymers, or a combination thereof.

19. (Original) The article of claim 9, wherein the formable metal substrate comprises one or more materials selected from the group consisting of steel, galvanized steel, stainless steel, aluminum, titanium, and alloys thereof.

20. (Original) The article of claim 9, wherein the formable metal substrate is primed.
